

HOW TO TURN ON THE SYSTEM

1. On the Screen Control, press the DOWN switch.
2. On the Projector Control, press the ON/OFF button. It may take up to one minute for the lamp to light up.

LAPTOP:

- a. On the Projector Control, press the VGA button for the **VGA2** option.
- b. Turn on your laptop and use the proper function key to send video to projector. When your laptop is connected, the system automatically switches to your laptop.

BUILT-IN COMPUTER:

- a. On the Projector Control, press the VGA button for the **VGA2** option.
- b. Turn on the built-in computer and disconnect your laptop if any. When your laptop is disconnected, the system automatically switches to the built-in computer.
- c. Logon information for built-in computer:

User Name: *****

Password: *****

DVD PLAYER:

- a. On the Projector Control, Press the VCR/DVD button.
- b. Turn on the VCR/DVD player and play the tape or DVD.

DOC CAMERA:

- a. On the Projector Control, Press the VGA button for the **VGA1** option.
- b. Turn on the document camera.

HOW TO TURN OFF THE SYSTEM

1. On the Projector Control, press the ON/OFF button. The button blinks and a confirmation message is displayed.
2. **Keep pressing** the ON/OFF button again and again until the projector turns off. Sometimes you must repeat 7 or 8 times!
3. On the Screen Control, press the UP switch.
